

---

## **INTRODUCTION**

---

This is the revised edition of the "Environmental Contract Requirements for Services to DAF Trucks NV". This version replaces the previous version from April 2010 and is part of the ISO 14001 certified environmental management system of DAF.

In this document is indicated which environmental requirements must be observed by external companies and their subcontractors. It relates to services on DAF premises, as far as these services are indicated in the contents of this document. As far as possible, the relevant legal requirements are indicated per location. However, the listing of these requirements is not limitative.

The environmental requirements are integral part of purchase orders and/or purchase contracts of DAF Trucks N.V. for the locations Eindhoven, Geldrop (Hooge Akker 2 and 4), resp. Sint Oedenrode in the Netherlands, Westerlo in Belgium and Leyland in the United Kingdom. For other DAF locations, this document is a guideline.

The document starts with "General Environmental Contract Requirements" for all involved services. In the second part, specific environmental requirements for specific services are identified.

This document is controlled by DAF Environment in consultation with the environmental coordinators of the locations in Eindhoven, Geldrop (Hooge Akker 2 and 4), Sint Oedenrode, Westerlo and Leyland.

**TABLE OF CONTENTS**

	<b>PAGE</b>
<b>INTRODUCTION</b>	1
<b>TABLE OF CONTENTS</b>	2
<b>GENERAL ENVIRONMENTAL CONTRACT REQUIREMENTS</b>	3
<b>SPECIFIC ENVIRONMENTAL CONTRACT REQUIREMENTS</b>	
Asbestos Removal <sup>1</sup>	5
Maintenance of Vending Machines <sup>1</sup>	5
Sampling/Analysis of waste water and discharged water <sup>2</sup>	6
Sampling/Analysis of air emissions and odour <sup>2</sup>	6
Soil Investigation/Soil Remediation <sup>2</sup>	7
Building/ Construction Work/ Maintenance of Buildings <sup>2</sup>	7
Catering <sup>1</sup>	8
Construction and inspection of impervious floors/sewerage <sup>2</sup>	8
Distribution and Storage of Process Chemicals <sup>2</sup>	9
Inspections and remediation of Underground Storage Tanks <sup>2</sup>	9
Inspections of Boilers <sup>2</sup>	10
Maintenance and Adjustment of (Gas) Burners <sup>2</sup>	10
Maintenance of Greenery (Gardening) <sup>2</sup>	11
Maintenance of Cooling Systems/ Air conditioning <sup>2</sup>	11
Maintenance of Cooling-Water Systems <sup>2</sup>	12
Maintenance/Cleaning of Interceptors/Oil Separators and of Sewerage system <sup>2</sup>	12
Cleaning Vehicles <sup>2</sup>	13
Reproduction Service/Printing <sup>1</sup>	13
Residues (waste): Collection, Storage and Transport <sup>1</sup>	13
Paintwork <sup>2</sup>	14
Cleaning <sup>1</sup>	14
Demolition <sup>1</sup>	14
Transport of DAF Products <sup>1</sup>	14

<sup>1</sup> = services with priority 1: see further page 3: General Environmental Requirements: Environmental Certificate

<sup>2</sup> = services with priority 2: see further page 3: General Environmental Requirements: Environmental Certificate

**GENERAL ENVIRONMENTAL CONTRACT REQUIREMENTS**

**1. Environmental Certificate**

- Suppliers with priority 1 (see Table of Contents):  
must have a valid ISO 14001 Environmental Certificate for the organizational unit performing activities on DAF premises;
- Suppliers with priority 2 (see Table of Contents):  
are not required, but expected to have a valid ISO 14001 Environmental Certificate for the organizational unit performing activities on DAF premises. If this certificate is available, this is a positive weighting factor in the selection process.

**2. Local regulations Environment & Safety**

Compliance with the local regulations for Environment & Safety is mandatory:

- |                         |   |
|-------------------------|---|
| Eindhoven/Geldrop (NL): | DAF Safety Regulations (SF 3685)  |
| Westerlo (B):           | DAF Safety Regulations (SF 5835)  |
| Leyland (UK):           | Health, Safety, Environmental, Fire and Security: Notes for Guidance to contractors |
| Other locations:        | National Legislation  |

**3. Good housekeeping**

The working environment has to be kept tidy and clean.

**4. Use of Energy**

The use of energy (electricity, gas) must be kept to an absolute minimum e.g. by switching off light, installations and equipment, if not needed for use.

**5. Chemicals**

- Before use, chemicals (inclusive dangerous substances and herbicides) must be approved by the local environmental coordinator. For this purpose, a copy of the Material Safety Data Sheet (MSDS) of the involved chemicals must be sent to the local environmental coordinator.
- Suppliers are not allowed to provide (approved) chemicals to DAF employees.
- The quantity of chemicals stored on DAF premises must be restricted to the maximum allowable daily inventory. If for some reason the inventory should exceed the maximum allowable amount, the local environmental coordinator must be contacted first.
- The storage of chemicals must comply with national legislation:  
Eindhoven/Geldrop (NL): PGS 15  
Westerlo (B): VLAREM  
Leyland (UK): Control of Substances Hazardous to Health Regulations (COSHH)  
Other locations: National Legislation
- Chemicals must be packaged in proper packaging. Barrels containing volatile substances (such as solvents) must be closed air-tight as much as possible. Packaging of dangerous substances must meet the specifications of the international ADR Legislation.
- The labelling of chemicals must comply with national legislation:  
Eindhoven/Geldrop (NL): ADR; Besluit verpakkingen en aanduiding milieugevaarlijke stoffen;  
Westerlo (B): ADR; VLAREM  
Leyland (UK): Chemicals (Hazard Information and Packaging for Supply) Regulations;  
Carriage of Dangerous Goods Classification Packaging and Labelling Regulations; ADR;  
Other locations: ADR
- Material Safety Data Sheet (MSDS) of all chemicals used must be available on the working location.

01-01-12

**6. Equipment**

Storage of equipment at DAF premises must be approved by the local environmental coordinator. The request for approval must be submitted via the local principal.

**7. Waste**

Prior to assignment to a supplier of services, the principal has agreed the way of waste removal with the supplier:

- Option 1:  
Waste material shall be removed by the supplier via the Waste Centre on the DAF premises. The waste must be supplied according the regulations of the local DAF Waste Centre for separation, labelling and packaging.
- Option 2:  
If agreed with the principal and local environmental coordinator that waste material will be removed by the supplier from the DAF premises, the supplier shall ensure that waste is removed according:
  - o **Nationa/local legislation:**

Eindhoven/Geldrop (NL):	Wet Milieubeheer
Westerlo (B):	VLAREA
Leyland (UK):	Environmental Protection Act and associated Regulations
Other locations:	National legislation
  - o **The DAF environmental policy “zero waste to landfill”**  
For waste, which will be removed from DAF premises, no landfill is allowed. To this end, the supplier shall present records of waste designation and waste treatment method to the principal.
- The volume and mass of waste material has to be minimised.

**8. Waste water**

Waste water may only be discharged at sites indicated by the local Environmental Coordinator.

**9. Problem reports**

- Irregularities, malfunctions or incidents with a detrimental effect on the environment (such as leaks and spills) must be reported immediately by phone to the local principal or Security Department. In case of incidents or injuries, the local Security Department must be notified immediately:

Eindhoven/Geldrop (NL):	Emergency number: 2222;
Westerlo (B):	Fire brigade: 8222; Security: 8500
Leyland (UK):	Emergency number: 3333
	Alternative Facilities and Maintenance department: 5789
Other locations:	Security
- Following this, the employees of the supplier must observe the instructions of Security and/or Fire brigade.

**10. Liability and Insurances**

- Liability is recorded in the “DAF General Purchasing Conditions”.
- The supplier shall conclude an insurance for the activities to be performed according the “DAF General Purchasing Conditions” and provide a copy of the insurance polis to DAF Purchasing, before starting the activities.

01-01-12

**ASBESTOS REMOVAL<sup>1</sup>****Selection Criteria**

1. The supplier must be in possession of a legal and valid recognition (including required training certificates of employees involved) for performing asbestos remediation according national legislation:  
the Netherlands: Asbestverwijderingsbesluit; Wet Milieugevaarlijke Stoffen  
Procescertificaat Asbestverwijdering van Stichting Certificatie Asbest (SCA) on the basis of standard SC 530;  
Belgium: ARAB;  
Other countries: national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the required certificates to the DAF principal and/or DAF Purchasing, before starting activities.
2. After the completion of the remediation, an inspection shall be done by taking air samples by an independent certified laboratory:  
The Netherlands: STER certificate for laboratories  
Other countries: national legislation
3. Removal of asbestos waste must be done by a recognised waste removal firm according national legislation:  
The Netherlands: Asbestverwijderingsbesluit  
Belgium: ARAB; VLAREA  
Other countries: national legislation  
  
Asbestos waste may only be dumped at dump sites with a specific permit or specifically indicated in the national law.
4. Asbestos remediations that make use of vacuum equipment with microfilters create a high volume of noise. The vacuum equipment must be equipped with mufflers. The installation may not be used according:  
Eindhoven/Geldrop (NL): permit: between 23.00-07.00 hours and in the weekend;  
Westerlo (B): VLAREM  
Other countries: national legislation

**MAINTENANCE OF VENDING MACHINES<sup>1</sup>**

**Contract requirements (in addition to the general environmental contract requirements)**

1. For waste removal: see chapter "General Environmental Contract Requirements": ad 7.
2. Waste must be removed according:
 

Eindhoven/Geldrop (NL):	the requirements of the Waste Centre on the DAF premises
Westerlo (B):	the requirements of the Waste Centre on the DAF premises
Other countries:	national legislation
3. Machines must be energy-efficient.
4. Machines with cooling equipment must be serviced by a supplier with a recognition according national legislation on the basis of European Directive 842/2006/EC on certain fluorinated greenhouse gases and Directive 1005/2009/EC on substances that deplete the ozone layer:
 

The Netherlands:	Besluit gefluoreerde broeikasgassen milieubeheer; Besluit ozonlaag afbrekende stoffen milieubeheer; Regeling gefluoreerde broeikasgassen en gereguleerde stoffen koelinstallaties
Belgium:	VLAREM
Other countries:	national legislation
5. Employees of the supplier must have a training certificate according the above mentioned national legal requirements.
6. The supplier controls a survey of cooling installations on the location with indication of refrigerant and volume. A log book of the maintenance of the cooling equipment, including the recording of cooling liquids, has to be available on the location.
7. The supplier shall report the volume of supplemented CFC cooling liquids to the local principal and local environmental coordinator annually as required for the Environmental Annual Report.

**SAMPLING/ANALYSIS OF WASTE WATER AND DISCHARGED WATER<sup>2</sup>**

**Selection Criteria**

1. The supplier must be in possession of a (legal) valid recognition (including potentially required training certificates of employees involved) for the sampling activities by an authorised body:
 

The Netherlands:	not mandatory: recognition by Raad van Accreditatie
Belgium:	according VLAREM; VLAREBO; ARAB; BELCERT
Other countries:	according national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the certificates of recognition to the DAF principal and/or DAF Purchasing, before starting activities.
2. Sampling must be done according to the local legal and/or permit requirements:
 

The Netherlands:	Bijlage 1 van de Heffingsverordening verontreiniging oppervlaktewater in Wet Verontreiniging Oppervlaktewater; Wet Milieubeheer;
	For waste water: according NEN 6600-1
	For surface water: according NEN 6600-2
Belgium:	VLAREM
Other countries:	National legislation
3. The supplier must have the analyses done in a laboratory accredited:
 

The Netherlands:	according NEN-EN-ISO 17025: for analysis
Belgium:	according VLAREM; VLAREBO; BELCERT
Other countries:	according national legislation
4. The supplier must conduct analyses using calibrated measuring equipment.

**SAMPLING/ANALYSIS OF AIR EMISSIONS AND ODOUR<sup>2</sup>**

**Selection Criteria**

1. The supplier must be in possession of a (legal) valid recognition (including potentially required training certificates of employees involved) for the sampling activities by an authorised body:
  - The Netherlands: Raad van Accreditatie: for sampling
  - Belgium: according VLAREM; VLAREBO; ARAB; BELCERT
  - Other countries: according national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the certificates of recognition to the DAF principal and/or DAF Purchasing, before starting activities.
1. Sampling must be done according to the local legal and/or permit requirements:
  - The Netherlands: Nederlandse Emissie Richtlijnen (NER)
  - Belgium: VLAREM
  - Other countries: National legislation
3. The supplier must have the analyses done in a laboratory accredited:
  - The Netherlands: according NEN-EN-ISO 17025
  - Belgium: according VLAREM; VLAREBO; BELCERT
  - Other countries: according national legislation
4. The supplier must conduct analyses using calibrated measuring equipment.

**SOIL INVESTIGATION/SOIL REMEDIATION<sup>2</sup>**

**Selection Criteria**

1. The supplier must have legally required and valid recognition (including potentially required training certificates of employees involved) for the field work:
  - The Netherlands: in the context of Wet Bodembescherming and KWALIBO Regeling:
    - for soil investigation: BRL SIKB 2000
    - for consultancy of soil remediation: BRL SIKB 6000
    - for soil remediation: BRL SIKB 7000
  - Belgium: according VLAREBO
  - Other countries: according national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the required certificates to the DAF principal and/or DAF Purchasing, before starting activities.
2. Investigations of soil and groundwater must be conducted according national regulations:
  - The Netherlands: protocol NVN 5740;
  - Belgium: standards in VLAREBO; disposal standards VLAREM; Permit of location Westerlo
  - Other countries: National legislation
2. Analyses of soil samples must be conducted in a laboratory certified by public authorities:
  - The Netherlands: STER certification
  - Belgium: according VLAREM; VLAREBO; BELCERT
  - Other countries: according national legislation

**BUILDING/ CONSTRUCTION WORK/MAINTENANCE OF BUILDINGS<sup>2</sup>**

**Scope**

Building and construction work, including welding, grinding, cutting, roofing.

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall request a local permit for building/construction work from the local Safety Department before starting activities:  
 Nederland: Request form SF 3597 for demolition, painting and fire-risky works  
 Contact: Security/Plant Emergency Organisation (telephone: 040-214 2995).
2. Outdoors use of machines is not permitted before 7 a.m. or after 7 p.m. on the DAF premises because of the noise impact.
3. Radio noise outside is only permitted before 7 a.m. or after 7 p.m. and at a level that is acceptable according the local environmental coordinator.
4. For waste removal: see chapter "General Environmental Contract Requirements": ad 7.

**CATERING<sup>1</sup>**

**Selection Criteria**

1. The supplier, who is servicing machines with cooling equipment, must be in possession of a legal and valid recognition (including required training certificates of employees involved) according national legislation on the basis of European Directive 842/2006/EC on certain fluorinated greenhouse gases and Directive 1005/2009/EC on substances that deplete the ozone layer:  
 The Netherlands: Besluit gefluoreerde broeikasgassen milieubeheer;  
 Besluit ozonlaag afbrekende stoffen milieubeheer;  
 Regeling gefluoreerde broeikasgassen en gereguleerde stoffen koelinstallaties  
 Belgium: VLAREM /SABEMAS  
 Other countries: National legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the required certificates to the DAF principal and/or DAF Purchasing, before starting activities.
2. The supplier controls a survey of cooling installations on the location with indication of refrigerant and volume.
3. A log book of the maintenance of the cooling equipment, including the recording of cooling liquids, has to be available on the location.
4. The supplier shall report the volume of supplemented CFC cooling liquids to the local principal and local environmental coordinator annually as required for the Environmental Annual Report.
5. Water and energy must not be used wastefully.
6. For waste removal: see chapter "General Environmental Contract Requirements": ad 6.

**INSPECTION AND REMEDIATION OF UNDERGROUND STORAGE TANKS<sup>2</sup>**

**Selection Criteria**

1. The supplier must be in possession of a legal and valid recognition (including potentially required training certificates of employees involved) for inspection and remediation of underground storage tanks:

The Netherlands: PGS 28  
Procescertificaat KIWA based on BRL-K904: for underground storage tanks;  
Belgium: VLAREM; VLAREBO  
Other countries: according national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the required recognition to the DAF principal and/or DAF Purchasing, before starting activities.
2. Inspections must comply with the national legal requirements:  
The Netherlands: PGS 28 (underground storage tanks);  
PGS 16 (LPG);  
PGS 30 (aboveground storage tanks till 150 m<sup>3</sup>)  
Belgium: VLAREM; VLAREBO  
Other countries: National legislation
3. Removal must be done according national legislation:  
The Netherlands: BRL K904  
Belgium: VLAREM  
Other countries: National legislation
4. Measurements must be conducted with calibrated measuring equipment.
5. A report must be drafted for each tank inspected and remediated. The report must be made available to the local DAF principal.
6. For waste removal: see chapter "General Environmental Contract Requirements": ad 7.

**INSPECTIONS OF BOILERS<sup>2</sup>**

**Scope**

See EC Directive on Pressure Equipment (PED)

**Selection Criteria**

1. The supplier must be in possession of a legal and valid recognition (including required training certificates of employees involved) for the inspection activities:

The Netherlands: in the context of the Activiteitenbesluit/BEMS:  
by Lloyd's Register Energy (or another Notified Body for inspecting pressurised vessels)  
Belgium: according VLAREM  
Other countries: according national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the required certificate to the DAF principal and/or DAF Purchasing, before starting activities.
2. An inspection report must be drafted for each boiler inspected.
3. The inspection report must be made available to the local DAF principal.
4. Measurements must be conducted with calibrated measuring equipment.

**MAINTENANCE AND ADJUSTMENT OF (GAS) BURNERS<sup>2</sup>**

**Selection Criteria**

1. The supplier must be in possession of a legal and valid recognition (including required training certificates of employees involved) for the maintenance and adjustment activities:  
The Netherlands: by SCIOS  
Belgium: Department Leefmilieu, Natuur en Energie (LNE)  
Other countries: National legislation

**Contract requirements (in addition to the environmental general contract requirements)**

1. The supplier shall provide a copy of the required certificate to the DAF principal and/or DAF Purchasing, before starting activities.
2. After each servicing, a maintenance report must be drafted.
3. This maintenance report must be given to the local DAF principal.
4. Measurements must be conducted with calibrated measuring equipment.

**MAINTENANCE OF GREENERY (GARDENING)<sup>2</sup>**

**Contract requirements (in addition to the general environmental contract requirements)**

1. Only legally permitted pesticides with an approval number and approved by the local Environmental coordinator may be used for maintenance of the green areas:  
The Netherlands: according Bestrijdingsmiddelenwet;  
Belgium: approval local Environmental Coordinator  
Other countries: according national legislation

For the approval, a copy of the Material Safety Data Sheet (MSDS) must be sent to the local Environmental Coordinator.

2. Fertilisers must be biodegradable.
3. For waste removal: see chapter "General Environmental Contract Requirements": ad 6.
4. Outside use of machines is not permitted before 7 a.m. or after 7 p.m. on the DAF premises because of the noise impact.
5. Radio noise outside is only permitted before 7 a.m. or after 7 p.m. and at a level that is acceptable to the local Environmental Coordinator.

**MAINTENANCE OF COOLING SYSTEMS/ AIRCONDITIONING<sup>2</sup>****Scope**

Cooling and freezing installations.

**Selection Criteria**

1. The supplier, who is servicing machines with cooling equipment, must be in possession of a legal and valid recognition (including required training certificates of employees involved) according national legislation on the basis of European Directive 842/2006/EC on certain fluorinated greenhouse gases and Directive 1005/2009/EC on substances that deplete the ozone layer:

The Netherlands:	Besluit gefluoreerde broeikasgassen milieubeheer; Besluit ozonlaag afbrekende stoffen milieubeheer; Regeling gefluoreerde broeikasgassen en gereguleerde stoffen koelinstallaties
Belgium:	VLAREM /SABEMAS
Other countries:	national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the required certificate to the DAF principal and/or DAF Purchasing, before starting activities.
2. The supplier controls a survey of cooling installations on the location with indication of refrigerant and volume.
3. A log book of the maintenance of the cooling equipment, including the recording of cooling liquids, has to be available on the location.
4. The supplier shall report the volume of supplemented CFC cooling liquids to the local principal and local environmental coordinator annually as required for the Environmental Annual Report.
5. Water and energy must not be used wastefully.

**MAINTENANCE OF COOLING-WATER SYSTEMS<sup>2</sup>****Contract requirements (in addition to the general environmental contract requirements)**

1. Only legally permitted pesticides with an approval number and approved by the local Environmental coordinator may be used in cooling water systems:

The Netherlands:	according Bestrijdingsmiddelenwet;
Belgium:	approval local Environmental Coordinator
Other countries:	according national legislation

For the approval, a copy of the Material Safety Data Sheet (MSDS) must be sent to the local Environmental Coordinator.

2. The dose of pesticides and/or use of other substances must be submitted for approval to the local Environmental Coordinator.
3. If automatic dispensing systems are used, the Material Safety Data Sheet (MSDS) must be fixed on the equipment.
7. Tanks and pipes of the dispensing systems must be labelled.

**MAINTENANCE/CLEANING OF INTERCEPTORS/ OIL SEPARATORS AND SEWERAGE<sup>2</sup>**

**Selection Criteria**

1. Employees of the supplier must have completed successfully the (legally) required training in order to work in the sewerage system:  
The Netherlands: "Veilig werken in riolering" for sewage inspection in sewage pit  
Belgium: according ARAB  
Other countries: according national legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. Maintenance and cleaning of the interceptors and oil separators (including sludge separators and drainage pipes and gutters) must be done in consultation with the local DAF principal according the guidelines:  
The Netherlands: BRL K10014
2. For cleaning/maintenance of interceptors and oil separators: after each cleaning and maintenance, a report must be drafted indicating the technical state of the oil and grease trap, and any repairs made. The report must be made available to the local DAF principal.
3. The (hazardous) waste thus derived from the oil and grease traps must be treated by a licensed waste treatment company and shall not be disposed off to landfill in the context of the DAF Environmental Policy "zero waste to landfill":  
The Netherlands: according Wet Milieubeheer;  
Belgium: according VLAREM; VLAREA  
Other countries: according national legislation
4. For each transport of hazardous waste, one copy of the transport document must be sent to the local DAF principal. This document shall show the implementation of the DAF Environmental Policy of "zero waste to landfill".

**CLEANING VEHICLES<sup>2</sup>**

**Contract requirements (in addition to the general environmental contract requirements)**

1. Vehicles may only be cleaned in washing areas set up for that purpose. Waste water/cleaning water must be contained within the area and are not allowed out of the washing area.
2. Water and energy must not be used wastefully.

**REPRODUCTION SERVICE/PRINTING<sup>1</sup>**

**Contract requirements (in addition to the general environmental contract requirements)**

1. Only low-ozone copying machines may be used on the DAF premises.

**RESIDUES (WASTE): COLLECTION, STORAGE AND TRANSPORT<sup>1</sup>**

**Selection Criteria**

1. The supplier must have legally required valid permits for collection, storage and transport of industrial waste and hazardous waste materials concerned according:

The Netherlands:	Wet Milieubeheer; Besluit inzamelen afvalstoffen; Regeling inzamelaars, vervoerders, handelaars en bemiddelaars van afvalstoffen
Belgium:	VLAREM; VLAREA; VLAREBO
Other countries:	National legislation

**Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall provide a copy of the permits to the DAF principal and/or DAF Purchasing, before starting activities.
2. The supplier shall comply to the legal requirements for storage and disposal of (hazardous) waste:
- |                  |   |
|------------------|---|
| Europe:          | European Waste Guideline = Eural                  |
| The Netherlands: | Wet Milieubeheer; Wet Vervoer Gevaarlijke Stoffen |
| Belgium:         | VLAREM; VLAREA; VLAREBO; ADR                      |
| Other countries: | National legislation                              |
- The waste shall be removed/treated by a certified waste removal/treatment firm and shall not be disposed off to landfill in the context of the DAF Environmental Policy "zero waste to landfill".
3. Waste containers for hazardous waste and oil containing scrap (such as contaminated with cutting oils and/or cooling emulsions) shall be stored above containment and covered.
4. Hazardous waste must be stored in compliance with national legal requirements:
- |                  |                         |
|------------------|-------------------------|
| The Netherlands: | PGS 15                  |
| Belgium:         | VLAREM; VLAREA; VLAREBO |
| Other countries: | National legislation    |
5. The waste containers for various categories of waste must be correctly labelled.
6. The number of categories of waste separated shall be determined in consultation with the local Environmental Coordinator.
7. An adequate registration and accounting system must be used and provided to the local DAF principal.
8. Measurements must be conducted with calibrated measuring equipment.
9. Periodically, a report on the quantity of residues collected must be sent to the local Environmental Coordinator and DAF principal.
- 10 For each transport of hazardous wastes, one copy of the transport document must be sent to the local DAF principal. This document shall show the implementation of the DAF Environmental Policy of "zero waste to landfill".

**PAINTWORK<sup>2</sup>****Contract requirements (in addition to the general environmental contract requirements)**

1. Water-based paint or coatings shall be used according national legislation:  
The Netherlands: Oplosmiddelenbesluit  
Belgium: according VLAREM  
Other countries: according national legislation
2. Paints or coatings without lead shall be used according PACCAR requirements.
3. The supplier shall request a local permit for building/construction work from the local Safety Department before starting activities:  
Eindhoven: Request form SF 3597 for demolition, painting and fire-risky works  
Contact: Security/Plant Emergency Organisation (telephone: 040-214 2995).
4. For waste removal: see chapter "General Environmental Contract Requirements": ad 7.

**CLEANING<sup>1</sup>****Selection Criteria**

1. The supplier shall have a valid Environmental Certificate based on ISO 14001 or EMAS for the organisation performing on the DAF premises, or have this as an objective within 2 years after the start of the contract.

**Contract requirements (in addition to the general environmental contract requirements)**

1. Water and energy must be used sparingly.
2. For waste removal: see chapter "General Environmental Contract Requirements": ad 7.

**DEMOLITION<sup>1</sup>****Contract requirements (in addition to the general environmental contract requirements)**

1. The supplier shall request a local permit for building/construction work from the local Safety Department before starting activities:  
The Netherlands: Request form SF 3597 for demolition, painting and fire-risky works  
Contact: Security/Plant Emergency Organisation (telephone: 040-214 2995).
2. The supplier shall comply with the legal requirements for demolition:  
The Netherlands: Besluit mobiel breken bouw- en sloopafval, 2004
3. Waste material created during demolition must be separated into individual categories of waste (wood, scrap, metal, construction waste, etc.). For waste removal: see chapter "General Environmental Contract Requirements": ad 7.
4. Demolition work (including grinding of construction waste) that causes high noise levels may not be done before 7 a.m. or after 7 p.m. at the DAF premises. If needed, approval of the local Environmental Coordinator must be obtained.

**TRANSPORTATION OF DAF-PRODUCTS<sup>1</sup>****Scope**

Transportation of commercial vehicles, components and associated spare parts.

**Contract requirements (in addition to the general environmental contract requirements)**

1. Transport equipment must be maintained periodically to prevent leaks on the DAF premises.
2. For transport of dangerous goods by road, the driver and truck shall be ADR certified.
